

having on the e-health revolution. It examines the accessibility of health-related websites for different populations and asks how we can close access gaps and ensure the reliability and trustworthiness of the information presented online. Darrell West and Edward Miller use multiple sources, including original survey research and website analysis, to study the content, sponsorship status, and public usage of health care-related websites, as well as the relationship between e-health utilization and attitudes about health care in the United States. They also explore the use of health information technology in other countries. The result is an important contribution to our understanding of health information innovation in America and around the world.

**Information Privacy Fundamentals for Librarians and Information Professionals** Cherie L. Givens 2014-10-14 As more information is collected, shared, and mined, the need to understand and manage information privacy has become a necessity for information professionals. Governments across the globe have enacted information privacy laws. These laws continue to evolve and the information privacy protections that have been established differ by country. A basic understanding of privacy law, information privacy approaches, and information security controls is essential for information professionals to properly manage private/personally identifiable information (PII) in differing

capacities in libraries, academic institutions, corporations, hospitals, and state and federal agencies. Understanding and knowledge of applicable privacy laws and the ability to write privacy policies and procedures for the proper handling of PII are crucial skills for librarians and other information managers. Information Privacy Fundamentals for Librarians and Information Professionals is tailored to the needs of librarians and information professionals. It introduces library and information professionals to information privacy, provides an overview of information privacy in the library and information science context, U.S. privacy laws by sector, information privacy policy, and key considerations when planning and creating a privacy program.
